MESSAGE FROM THE CHAIRMAN - EMERITUS

Dear Fellow Shareowners,

Falling crude oil price augers well for Indian Economy. Devaluation of the Chinese currency is both a reason to rejoice and worry. It will now depend on how the Indian government, RBI and the corporate sector respond to this challenge. Lower input costs are going to help Indian companies. With its inherent resilience the Indian economy on the back of a large consumer base has the ability to benefit from the global turmoil. There is an opportunity to move at a faster pace by undertaking reforms.

We at Jai Corp are committed to frame our business plans, based on our core competencies that will add more value to our products and services and herald a new growth era. We always maintain that our performance and growth are intrinsically linked with the sustenance and development of the communities in which we operate. We believe that growth and responsibility go hand-in-hand. We have always given the highest priority to our programmes engaging various sections of the society.

We remain committed to safe and efficient operations and to conducting our business in an environmentally sound and socially responsible manner.

I thank all our shareholders who have consistently reinforced their faith and trust in the Company. I am confident that we will strive hard to create sustainable growth for all our stakeholders.

I thank our Board of Directors for their valuable insight, constant support and guidance at every stage. I also thank our stakeholders for their unstinted support.

With best wishes,
Sincerely,

Jai Kumar Jain

MESSAGE FROM THE CHAIRMAN

Dear Fellow Shareowners,

In the financial year ended 31st March, 2015 your Company's gross turnover decreased by 3.35% from ₹ 750.62 crore to ₹ 725.51 crore in FY 2014-15. Net Profit during the period decreased by 25.36 % from ₹ 78.18 crore to ₹ 58.35 crore mainly due to reduced profit in the Plastic Processing Division and loss in the Steel Division.

In the quarter ended 30th June, 2015 your Company's un-audited financial results show that net total income from operations increased to ₹169.85 crore from ₹ 168.45 crore of the previous year's June quarter. Net Profit during the same period however, increased by about 20% from ₹ 14.62 crore to ₹ 17.58 crore. The increase can be attributed to a robust performance by the Company's Plastic Processing Division. However, there was no activity in the Steel Division due to lack of demand

The year 2014-15 started with a lot of promise with a new government in the saddle, presenting its first full budget. We even had the new Companies Act, 2013. The Indian economy has come a long way since the difficulties in 2012-13 as a result of actions taken by the Government and regulators. Growth is stronger, the current account deficit has narrowed significantly and we are well on the path of achieving targets for fiscal deficit.

The overheated Chinese economy has started exhibiting signs of slow down. Concerns about the economic health of Greece continues. Currencies across the world are impacted by China's decision to devalue Renminbi by 2% following which the Renminbi and Chinese stock markets witnessed its biggest one-day fall in a decade. The Indian currency got impacted in the process with the Indian Rupee touching a two-month low against the US dollar. Indian stock market also reacted sharply. Earlier, the price of gold had slumped. The good news for the Indian economy is the falling crude oil price.

The investments in the real estate sector are long-term in nature and are expected to unlock their potential value in the coming years.

In our asset management business, we manage and advise a collective corpus of approximately ₹ 2,086 crore (USD 251 million). The funds' investments are focused on mix – use development projects including large townships. The Urban Infrastructure Opportunities Fund has refunded about ₹ 621 crore to its investors by way of repurchase of units and return of capital as on 31st March 2015.

Special Economic Zones (SEZs) in India are facing grave challenges. Some key tax benefits which were withdrawn have made SEZ a difficult business proposition. The Maharashtra SEZ Act vital for SEZs in the State has been pending enactment for too long.

We have always believed in a judicious mix of traditional and new business. While new businesses, with their inherent risks, need a long lead time to develop, the traditional businesses can give us the cash flow and stability. All our traditional businesses have in the past few years consolidated and are now at a threshold where we can say we are building on our strengths. As a Company, we have always believed in pursuing a responsible business strategy and delivering quality. This combined with hard work and dedication of our entire team has helped your Company maintain a profitable path even during uncertain times.

I am grateful to the Board of Directors for their unwavering support and guidance. I also take this opportunity to express my gratitude to all our stakeholders, who have reposed their trust in us and extended their constant support.

With best wishes,
Sincerely,

Anand Jain

BUSINESS REVIEW

Urban Integrated Infrastructure

Special Economic Zones (SEZs)-

Sector Overview:

The SEZ Industry in India is facing grave challenges for last few years. Govt. of India (GoI) has withdrawn key tax benefits (earlier available) which have made SEZ a difficult business proposition. In addition to this, Maharashtra SEZ Act which provides State level fiscal benefits has been pending enactment since long. Govt of Maharashtra (GoM) had recognized the serious difficulties faced by SEZ in Maharashtra and had allowed SEZ to exit and move towards being developed into Integrated Industrial Area (IIA). GoM has appointed a committee to look in to the modalities for conversion from SEZ to IIA. Their report is still awaited.

Jai Corp is a stakeholder in entities developing SEZs in Maharashtra.

I- Navi Mumbai SEZ Private Limited (NMSEZ)

Performance Overview:

NMSEZ has commenced horizontal and vertical development of SEZ in a phased manner. NMSEZ is facing demand constraints due to worldwide recession and financial crisis in many European countries. The Maharashtra SEZ Act had been introduced in the Maharashtra Legislature, but is awaiting enactment since quite some time. GoM has indicated that pending enactment of Maharashtra SEZ Act, they may announce and make effective a new SEZ policy. In the absence of fiscal incentives in the State, it is not very easy to attract the units in the SEZ. The withdrawal of key tax benefits by GoI have made SEZs less attractive. GoM has, in its Industrial Policy of 2013 subject to certain terms and conditions, allowed SEZ to exit and move towards being developed as Integrated Industrial Area. NMSEZ is in discussion with its Joint Venture Partner CIDCO to continue developing SEZ and at same time keep option open to develop Integrated Industrial Area depending upon demand from Industry and Services. The company has been obtaining validity extension from Board of Approval for its various SEZs from time to time.

II- Mumbai SEZ Limited (MSEZ)

Performance Overview:

MSEZ has acquired land in Uran, Pen and Panvel areas in the state of Maharashtra. So far, consent award and sale deeds have been executed for around 4,600 acres. The subject land is not contiguous. The new Land Acquisition Act which has been notified in January, 2014 makes it difficult to buy land for contiguity. MSEZ is in discussion with GoM on way forward. MSEZ is also awaiting further amendment to Land Acquisition Act.

III- Rewas Ports Limited (RPL)

Performance Overview:

All statutory approvals have been obtained. RPL has signed the lease deed for 839 hectares (Ha) of inter tidal land. The Government land of about 167 hectares has been transferred by the Government of Maharashtra to Maharashtra Maritime Board. RPL will sign the lease deed for the same at the time of financial closure. RPL has been in discussions with Indian Railways and Government of Maharashtra in order to firm up the rail and road connectivity of the port with the hinter land, but progress has been slow. RPL has been persistently working to resolve the issue related to right of way from Mumbai Port Trust, but process is slow.

Real Estate

Sector Overview:

As per data available from the Ministry of Urban Development website: *"In India out of the total population of 1210.2 million as on 1st March, 2011, about 377.1 million are in urban areas. The net addition of population in urban areas over the last decade is 91.0 million.*

The percentage of urban population to the total population of the country stands at 31.6. There has been an increase 3.35 percentage points in the proportion of urban population in the country during 2001-2011.

The provisional results of Census 2011 reveals that there is an increase of 2774 towns comprising 242 Statutory and 2532 Census towns over the decade. Growth rate of population in urban areas was 31.8%."

The Finance Minister in his budget speech stated – "... A step was taken in the last Budget to encourage Real Estate Investment Trusts (REITs) and Infrastructure Investments Trusts (InvITs) by providing partial pass through to them. These collective investment vehicles have an important role to revive construction activity. A

large quantum of funds is locked up in various completed projects which need to be released to facilitate new infrastructure projects to take off. I therefore propose to rationalise the capital gains regime for the sponsors exiting at the time of listing of the units of REITs and InvITs, subject to payment of Securities Transaction Tax (STT). The rental income of REITs from their own assets will have pass through facility."

With these initiatives, it is expected that stage is set for the real estate sector to enter into a new growth phase.

Performance Overview:

Certain subsidiaries of Jai Corp have acquired land. The same may be consolidated for the purpose of development subject to the applicable legislations at that point of time. The Company is of the view that any presumed fall in the current valuation of land held by some of the subsidiary companies is a temporary phenomenon. These are long-term investments and in the course of time are expected to realise their fair value.

Asset Management

Sector Overview:

Private Equity (PE) investments in India saw a robust increase in 2014 over 2013. Deal value, including real estate, infrastructure and venture capital (VC) deals, increased by 28% to \$15.2 billion— inching closer to 2007 peak levels of \$17.1 billion.

In 2015, PE firms plan to increase their focus on fund-raising, and they cite track record, team expertise and exit success as the most important factors in this regard. Yet, when it comes to raising India-focused funds, PE firms remain challenged by the regulatory environment, macroeconomic uncertainties such as currency and inflation, and the longer gestation period for investments. However, the majority still expect more fruitful fund-raising in 2015 by the PE Funds than in past years.

SEBI has brought all kind of pooled investments under the Alternative Investment Funds (AIF) Regulations and thereby bringing more transparency and accountability in the functioning of the alternate asset industry. It is expected that the new regulations will provide a more conducive environment to the growth of the industry. Since the new AIF Regulations, 135 funds have already registered themselves as AIF. As on 31st March, 2015 the funds raised by category I, II, III of the AIF amounted to ₹ 9,504 crore and the investment made till 31st March, 2015 were ₹ 7,356 crore.

Realty funds are still upbeat despite sluggish demand for new houses. Even as both housing sales and demand are down, AIFs are getting active in that most funds are betting on the long-term investment potential in the sector rather than short term exit horizons. While a Knight Frank report notes that housing sales had dropped by 17 per cent across six cities with National Capital Region seeing the sharpest drop in home sales, a CBRE report also doesn't paint a rosy picture of the sector, stating that residential sales declined by approximately 30 per cent year-on-year by the end of 2014 in the seven leading cities of the country, largely due to high price points, sticky interest rates and cautious buyer sentiments. The general slackness in residential sales was primarily triggered by the Affordability Index sliding in certain cities, it added. Real estate funds are, however, bullish on the long-term potential.

Our Business:

Jai Corp is present in this industry through its wholly owned subsidiary - Urban Infrastructure Venture Capital Limited (UIVCL), a venture capital management company. UIVCL is the manager to Urban Infrastructure Opportunities Fund (UIOF), a scheme of Urban Infrastructure Venture Capital Fund (UIVCF), a SEBI registered fund. UIOF is a close ended India domiciled venture capital fund having raised a corpus of approximately ₹ 2,434 crore.

UIVCL, is also Indian advisor to Urban Infrastructure Capital Advisors (UICA), investment manager to India focused real estate fund Urban Infrastructure Real Estate Fund (UIREF), having a total capital commitment of \$ 250 million.

The investments of these Funds' are focused on large townships and mixed-use development projects in Tier-I and Tier-II cities of western and southern India. These Funds have invested in 26 special purpose vehicles spread across 12 cities of India.

Performance Overview:

The tenure of UIOF originally got completed in June 2013. However, the Trustees based on the recommendation of UIVCL have extended the tenure for two further periods of one (1) year each till June, 2015. Further the Trustees have extended the tenure of the Fund with the consent of the majority of the Investors till 31st December, 2016 in order to facilitate the exit of the investments made by the Fund in the SPVs. Post the exit of the investments, the Fund will be wound-up. UIOF has refunded till 31st March 2015 ₹ 621 crore to its contributors by way of repurchase of units and return of capital/profits.

In FY 2014-15, UIVCL earned an income of ₹ 26.72 crore and profit after tax of ₹ 6.13 crore. The reduction in the revenue and profit is on account of the non-charging of the Investment Management fees w.e.f. July, 2014.

Provision for diminution in the value of long-term investments is made only if such decline is other than temporary in the opinion of the management. - ii) Monetary items denominated in foreign currencies at the year-end are restated at the closing rates. In case of any items, covered by forward exchange contracts, the difference between the closing rate and rate on the date of the contract is recognized as exchange rate difference and the premium paid on forward contracts not intended for trading or speculation purpose is amortised as expense over the life of the contract.
- iii) Non-monetary items which are carried in term of historical cost denominated in a foreign currency are reported using the exchange rate at the date of transaction.
- iv) Any income or expense on account of exchange difference either on settlement or on translation is recognised in the Statement of Profit and Loss.

1.11 REVENUE RECOGNITION

Revenue is recognised only when it can be reliably measured and it is reasonable to expect ultimate collection. Revenue from operations include sales of goods, services, scrap, commission, export incentives, excise duty and service-tax but excludes sales tax/ Value Added Tax and is recognised when significant risk and rewards of ownership of the goods have passed to the buyer. Dividend Income is recognised when right to receive the payment is established by the balance sheet date. Commission and job-work income are recognised on an accrual basis in accordance with the terms of relevant agreement.

1.12 EMPLOYEE BENEFITS

- i) Short-term employee benefits are recognized as an expense at the undiscounted amount in the Statement of Profit and Loss for the year in which the related service is rendered.
- ii) Post employment and other long-term employee benefits are recognized as an expense in the Statement of Profit and Loss for the year in which the employee has rendered services. The expense is recognized at the present value of the amount payable determined using actuarial valuation techniques. Actuarial gains and losses in respect of post employment and other long-term benefits are charged to the Statement of Profit and Loss.
- iii) Compensated absences are accounted similar to the short-term employee benefits.
- iv) Retirement benefits in the form of Provident Fund and other Funds are defined contribution scheme and the contributions are charged to the Statement of Profit and Loss of the year when the contribution to the respective funds are due. There are no other obligations other than the contribution payable to the fund.

1.13 BORROWING COST

Borrowing costs that are attributable to the acquisition or construction of qualifying assets are capitalised as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for intended use. All other borrowing costs are charged to revenue.

1.14 PROVISION FOR CURRENT AND DEFERRED TAX

Provision for current tax is made after taking into consideration benefits admissible under the provisions of the Income-tax Act, 1961. Deferred tax resulting from "timing difference" between book and taxable profit is accounted for using the tax rates and laws that have been enacted or substantively enacted as on the balance sheet date. A deferred tax asset is recognized and carried forward only to the extent that there is a reasonable certainty that it will be realized in future. In the case of unabsorbed depreciation and carry forward tax losses, deferred tax asset is recognised only if there is virtual certainty supported by convincing evidence that it can be realised against future taxable profits. The carrying amount of deferred tax assets is reviewed at each balance sheet date for their appropriateness.

NOTES ON FINANCIAL STATEMENTS FOR THE YEAR ENDED 31st MARCH, 2015

Deferred tax assets and deferred tax liabilities are offset if legally enforceable right exists to set-off current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to the taxes on income levied by same governing taxation laws.

Minimum Alternative Tax (MAT) is recognised as an asset only when, and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. In the year in which the MAT credit becomes eligible to be recognised as an asset in accordance with the recommendations contained in Guidance Note issued by the ICAI, the said asset is created by way of a credit to the Statement of Profit and Loss and shown as MAT Credit Entitlement. The Company reviews the same at each balance sheet date and writes down the carrying amount of MAT Credit Entitlement to the extent there is no longer convincing evidence to the effect that the Company will pay normal income-tax during the specified period.

1.15 IMPAIRMENT OF ASSETS

The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal/external factors. An asset is treated as impaired when the carrying amount exceeds its recoverable value. The recoverable amount is the greater of the asset's net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to the present value using a pre-tax discount rate that reflects current market assessment of the time value of money and risks specific to the assets. An impairment loss is charged to the Statement of Profit and Loss in the year in which an asset is identified as impaired. After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life. The impairment loss recognized in prior accounting periods is reversed if there has been a change in the estimate of recoverable amount.

1.16 PROVISIONS, CONTINGENT LIABILITIES AND CONTINGENT ASSETS

A provision is recognised when the Company has a present obligation as a result of past event and it is probable that an outflow of resources embodying economic benefit will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to present value and are determined based on the best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates. A contingent liability is disclosed, unless the possibility of an outflow of resources embodying the economic benefit is remote. Contingent assets are neither recognized nor disclosed in the financial statements.

1.17 DERIVATIVE TRANSACTIONS

In respect of derivative contracts, premium paid, gain/losses on settlement and losses on restatement are recognised in the Statement of Profit and Loss except in case where they relate to the acquisition or construction of fixed assets, in which case, they are adjusted to the carrying cost of such assets.

1.18 SUBSIDY

Subsidy relating to revenue expenditure for the year is adjusted against the related expenses.

1.19 EARNINGS PER SHARE

Basic earnings per share are calculated by dividing the net profit or loss for the year attributable to equity share holders (after deducting preference dividend and attributable tax) by the weighted average number of equity shares outstanding during the year. The weighted average number of equity shares outstanding during the year is adjusted for events such as bonus issue, bonus element in a right issue, shares split and reserve share splits (consolidation of shares) that have changed the number of equity shares outstanding, without a corresponding change in resources. For the purpose of calculating diluted earning per share, the net profit or loss for the year attributable to equity share holders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

1.12.14 PROVISION FOR CURRENT AND DEFERRED TAX

Provision for current tax is made after taking into consideration benefits admissible in each of the entity in the group, in accordance with the provision of applicable tax laws of the respective jurisdiction where the entity is located. Deferred tax resulting from "timing difference" between book and taxable profit is accounted for using the tax rates and laws that have been enacted or substantively enacted as on the balance sheet date. A deferred tax asset is recognized and carried forward only to the extent that there is a reasonable certainty that it will be realized in future. In the case of unabsorbed depreciation and carry forward tax losses, deferred tax asset is recognised only if there is virtual certainty supported by convincing evidence that it can be realised against future taxable profits. The carrying amount of deferred tax assets is reviewed at each balance sheet date for their appropriateness.

Deferred tax assets and deferred tax liabilities are offset if legally enforceable right exists to set-off current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to the taxes on income levied by same governing taxation laws.

Minimum Alternative Tax (MAT) is recognised as an asset only when, and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. In the year in which the MAT credit becomes eligible to be recognised as an asset in accordance with the recommendations contained in Guidance Note issued by the ICAI, the said asset is created by way of a credit to the Statement of Profit and Loss and shown as MAT Credit Entitlement. The Company reviews the same at each balance sheet date and writes down the carrying amount of MAT Credit Entitlement to the extent there is no longer convincing evidence to the effect that the Company will pay normal income-tax during the specified period.

1.12.15 IMPAIRMENT OF ASSETS

The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal /external factors. An asset is treated as impaired when the carrying amount exceeds its recoverable value. The recoverable amount is the greater of the asset's net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to the present value using a pre-tax discount rate that reflects current market assessment of the time value of money and risks specific to the assets. An impairment loss is charged to the Statement of Profit and Loss in the year in which an asset is identified as impaired. After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life. The impairment loss recognized in prior accounting periods is reversed if there has been a change in the estimate of recoverable amount.

1.12.16 PROVISIONS, CONTINGENT LIABILITIES AND CONTINGENT ASSETS

A provision is recognised when the Company has a present obligation as a result of past event and it is probable that an outflow of resources embodying economic benefit will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to present value and are determined based on the best estimate required to settle the obligation

NOTES ON CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31st MARCH, 2015

at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates. A contingent liability is disclosed, unless the possibility of an outflow of resources embodying the economic benefit is remote. Contingent assets are neither recognized nor disclosed in the financial statements.

1.12.17 DERIVATIVE TRANSACTIONS

In respect of derivative contracts, premium paid, gain/losses on settlement and losses on restatement are recognised in the Statement of Profit and Loss except in case where they relate to the acquisition or construction of fixed assets, in which case, they are adjusted to the carrying cost of such assets.

1.12.18 SUBSIDY

Subsidy relating to revenue expenditure for the year is adjusted against the related expenses.

1.12.19 EARNINGS PER SHARE

Basic earnings per share are calculated by dividing the net profit or loss for the year attributable to equity share holders (after deducting preference dividend and attributable tax) by the weighted average number of equity shares outstanding during the year. The weighted average number of equity shares outstanding during the year is adjusted for events such as bonus issue, bonus element in a right issue, shares split and reserve share splits (consolidation of shares) that have changed the number of equity shares outstanding, without a corresponding change in resources. For the purpose of calculating diluted earning per share, the net profit or loss for the year attributable to equity share holders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.
